

ABSTRACT OF THE DISCLOSURE

A computer-implemented method, including receiving, from a first communication device, and storing information regarding an available ticket for a portion of an event prior to a start, completion, or conclusion, of the event or when a first individual or a third individual is leaving a venue of the event or leaving during the event, processing information regarding a ticket request or a ticket option request using the information regarding an available ticket, generating a ticket availability message or ticket option availability message, and transmitting the ticket availability message or ticket option availability message to a second communication device associated with a second individual before a completion or a conclusion of the event.
